ABSTRACT

One in a series of over 50 similar listings relating to handicapped and-gifted children, the annotated bibliography contains 92 references selected from Exceptional Child Education Abstracts written for or about parents of exceptional children. Manuals, guides, presentations of suggested activities and child rearing techniques, and other such informative documents addressed to parents or concerned with the role of parents are included. Bibliographic data, availability information, indexing and retrieval descriptors, and an abstract are given for each entry. Author and subject indexes are provided. (KW)

This bibliography is a product of the Information Processing
Unit, CEC-ERIC Information Center on Exceptional Children.

The work presented or reported herein was performed pursuant to a grant from the Bureau of
Education for the Handicapped, US Office of Education, Department of Health, Education, and
Welfare. However, the opinions expressed herein do not necessarily reflect the position or policy
of the US Office of Education and no official endorsement by the US Office of Education should
be inferred.

The CEC Information Center on Exceptional Children

With a grant from the US Office of Education, the CEC Information Center was established at The Council for Exceptional Children to serve as a comprehensive source of information on research, instructional materials, programs, administration, teacher education, methods, curriculum, etc. for the field of special education. The Center functions as the Clearinghouse on Exceptional Children in the Educational Resources Information Centers (ERIC) program and also as a member center in the Instructional Materials Centers Network for Handicapped Children and Youth (IMCNHCY). In addition, the CEC Center's program includes a commitment to a concentrated effort towards the development of products which will interpret research results into educational methods and practices.

How to Use This Bibliography

The abstracts in this bibliography have been retrieved from the computer stored information of the CEC Information Center on Exceptional Children. Abstracts represent the Center's complete holdings on the topic as of the date indicated.

How to Read the Abstract

Each abstract contains three sections--bibliographic data, descriptors, and a summary of the document. The bibliographic section provides the document's identifying number (ED and/or EC), publication date, author, title, source, and availability. The descriptors indicate the subjects with which a document deals. The summary provides a comprehensive overview of the document's contents and in some cases document availability is announced here.

How to Use the Indexes

Some bibliographies in *Exceptional Children Bibliography Series* contain author and/or subject indexes. In these bibliographies, readers seeking work on a specific aspect of the general topic may consult the subject index to be referred to specific abstract numbers. Abstracts dealing with several topics may be identified by finding the same abstract number under two or more subjects in the subject index.

How to Purchase Documents

For documents available from their publishers, information on price and address is included in the abstract.

Many documents may be purchased in microfiche (a 4" x 6" microfilm card containing up to 70 pages of information) and/or hard copy (readable size photo reproduced pages) reproduction from the ERIC Document Reproduction Service. For example, "EDRS mf" indicates the document may be purchased in microfiche reproduction and "EDRS mf, hc" indicates the document may be purchased in both microfiche and hard copy reproduction.

To determine purchase price for hard copy multiply the document's number of pages by \$.05, then add \$.10. To determine purchase price for microfiche, use the table below. For example a 44 page document in hard copy would cost \$2.30 (44 x \$.05 + \$.10) and in microfiche would cost \$.25.

To order document reproductions, provide the ED number of the desired document, the number of copies being ordered, and the type of reproduction desired (microfiche or hard copy). Payment must accompany orders totaling less than \$5. Add a special handling charge of \$.50 to all orders. The ERIC Document Reproduction Service is registered to collect sales taxes. Orders from states which have sales tax laws should include payment of the appropriate tax or tax exemption certificate. A 25 percent service charge, calculated to the nearest cent, must accompany orders from outside the United States, its territories, and possessions.

Orders should be sent to:

ABSTRACTS

ABSTRACT 10053

EC 01 0053 ED 011 711
 Publ. Date 64
 Lowenfeld, Berthold
Our Blind Children, Growing and Learning with Them.
 EDRS not available

Descriptors: exceptional child education; visually handicapped; family (sociological unit); children; child rearing; social development; blind; parent attitudes; nursery schools; kindergarten; elementary grades; residential schools; instructional materials; adolescents; parent responsibility; student placement; infants; children

Written as an aid to parents, this book presents facts on blindness and practical information on the rearing of blind children from infancy through adolescence. Information is given about teaching blind children skills and habits related to eating, toilet training, sleeping, dressing, walking, talking, and playing. Schooling and related questions of readiness, placement, and special materials and methods are discussed. Concerns of the blind adolescent are presented. Questions often asked by parents of blind children are answered in a separate chapter. The appendix lists 34 books and pamphlets about children and blind children, three periodicals and seven organizations concerned with the blind, and sources of information about educational facilities for the blind. This book is available from Charles C Thomas, Publisher, 301-327 East Lawrence Avenue, Springfield, Illinois 62703, for \$7.00. (MY)

ABSTRACT 10076

EC 01 0076 ED 012 528
 Publ. Date 64
 Smith, Bert Kruger
No Language but a Cry.
 EDRS not available

Descriptors: exceptional child education; family (sociological unit); emotionally disturbed; residential centers; special schools; parent role; children; mental health; special classes; therapeutic environment; parent child relationship; rehabilitation; child development; etiology; program descriptions; prevention; medical treatment; special services; hospital schools; day care programs; League School; Sonia Shankman Orthogenic School; Hawthorne Center

Written for parents, this book is intended to provide understanding of the disturbed child. Symptoms of emotional disturbance as they appear from infancy through adolescence are listed and possible causes noted. Parents are told how to obtain professional help and the kinds of service that are available. Educational and treatment aspects of facilities such as special classes, special schools, day centers, foster homes, residential centers, and hospitals are discussed. Programs of three treatment centers, the

League School, the Sonia Shankman Orthogenic School, and the Hawthorne Center are described. Recommendations for prevention and treatment are made. This document is available from Beacon Press, Boston, Massachusetts, for \$5.00. (MY)

ABSTRACT 10084

EC 01 0084 ED 015 568
 Publ. Date 63
 Harris, Grace M.
Language for the Preschool Deaf Child.
 EDRS not available

Descriptors: exceptional child education; aurally handicapped; language; preschool children; deaf; teaching guides; language development; language instruction; responsibility; learning activities; lesson plans; lipreading; parent child relationship; parent education; parent responsibility; reading readiness; records (forms); sensory experience; nursery schools; auditory training; children; community; speech instruction; adjustment (to environment)

Written for both parents and teachers, this book presents concrete suggestions regarding the adjustment of the deaf child and his family to the community in which they live. Speech, speech reading, auditory training, reading readiness, and other developmental activities are discussed in relation to language development. Fundamental language training and activities for language development are described. There are 115 specific lesson plans covering the above categories. The last section presents information for organizing a nursery school for hearing-impaired children. The physical facilities, staff, equipment, supplies, teaching materials, and record forms are described. A bibliography of 223 references is included. This document was published by Grune and Stratton, 381 Park Avenue South, New York, New York 10016, and is available for \$7.25. (EB)

ABSTRACT 10131

EC 01 0131 ED 016 346
 Publ. Date 59
 Dittmann, Laura L.
The Mentally Retarded Child at Home, a Manual for Parents.
 Children's Bur., Welfare Admin., Washington, D. C.
 EDRS not available

Descriptors: exceptional child education; mentally handicapped; self care skills; child development; child rearing; early childhood; adolescents; childhood needs; parents; parent role; parent child relationship; education; recreation; recreational activities; skill development; family relationship; health; learning activities; personal adjustment; student adjustment; toys

This manual is devoted chiefly to the management of young retarded children

and concentrates on day-to-day activities--physical health, mental health, need for love and affection, sibling understanding, and training in self help and other skills. Early characteristics and needs are discussed. The following skills are treated--feeding, drinking, bathing, walking, behavior, toilet training, dressing, cleanliness and manners, discipline, speech, play, and group experiences. Problems of school entrance and adjustment to adolescence are considered. A list of suggested toys, equipment, and activities for home play is included. This document is available from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402, for \$0.35. (DF)

ABSTRACT 10167

EC 01 0167 ED 018 904
 Publ. Date 67
 Damon, Alice A. And Others
Feeding the Child with a Handicap.
 Children's Bureau, Welfare Administration, Washington, D. C.
 EDRS not available

Descriptors: exceptional child education; self care skills; child development; infants; nutrition; nutrition instruction; skills; child care; habit formation; object manipulation; parents; parent education; handicapped children; skill development; handicapped; children; child rearing; parent role

Suggestions on meeting nutritional and feeding skill needs of handicapped children are presented for parents. Principles of growth and development common to all children and the effect this development has on feeding are discussed. Instructions are given for encouraging control of swallowing, sucking, tongue control, chewing, and self-feeding. Drawings illustrate some feeding techniques and adapted spoons and dishes. A guide to meal planning for the average child's nutritional needs is included, and suggestions are given for special diets for the overweight child and the underweight child. A list of 19 additional Children's Bureau pamphlets is provided. This document is available from the Superintendent of Documents, Government Printing Office, Washington, D.C. 20402, for \$0.20. (SB)

ABSTRACT 10193

EC 01 0193 ED 018 909
 Publ. Date 68
 Heard, J. Norman
Hope through Doing. John Day Books in Special Education Series.
 EDRS not available

Descriptors: exceptional child education; mentally handicapped; family (sociological unit); parent responsibility; parent attitudes; parent reaction; parent child relationship; case studies (education); family involvement; family life; family problems; planning; organizations (groups); vocational education;

sheltered workshops; employment opportunities; childhood needs

The author relates how he and his wife learned about mental retardation in each of their three children, how they reacted, and how they tried to cope with the situation. He describes their experiences in attempting to build a future for their children by helping to organize several parent associations, create the first vocational training center in Texas, and develop a botanical garden that might employ handicapped persons. Appendixes suggest how to plan for the future of mentally retarded children and how to help the child at home. Information is included on the National Association for Retarded Children and its member units. An annotated list of 21 suggested readings is provided. This document is available from the John Day Company, New York, New York, for \$4.50. (DF)

ABSTRACT 10240

EC 01 0240 ED 018 023
Publ. Date 67
Cruikshank, William M.
The Brain-Injured Child in Home, School, and Community.
EDRS not available

Descriptors: exceptional child education; learning disabilities; teaching methods; instructional materials; educational needs; minimally brain injured; clinical diagnosis; individual characteristics; behavior; special programs; audiovisual instruction; learning activities; parent role; psychotherapy; educational diagnosis; environmental influences; language development; space orientation; medical treatment; etiology; program evaluation

Written for parents, teachers, and others who work daily with brain injured children, the book includes considerations of the symptoms of brain damage, recommendations for diagnostic procedures and personnel, and descriptions of treatment techniques that have proved effective at home and in the classroom. An introduction to the brain injured child is given, and psychological and learning problems are delineated. All the parts of a complete diagnosis are examined. A special education program is described in terms of stimuli control, adjustment to space, and the role of structure. Appropriate teaching materials, visual motor materials and activities, and steps in the development of abstract concepts are discussed. Cited as important to the overall program are motor training, provision of psychotherapy, and language and communication development. Remarks are made concerning the future and planning for the families of such children. Included for each chapter are selected references of interest to parents, another list of references for teachers, and additional readings. The appendix contains descriptions of national, state, and local organizations concerned with brain injured children. This document is available from the Syracuse University Press, Syracuse, New York, for \$6.50. (DF)

ABSTRACT 10250

EC 01 0250 ED 018 049
Publ. Date 67
Ellingson, Careth
The Shadow Children, a Book about Children's Learning Disorders.
EDRS not available

Descriptors: exceptional child education; learning disabilities; reading; tests; teaching methods; children; minimally brain injured; case studies (education); reading difficulty; reading failure; behavior; clinical diagnosis; educational objectives; remedial instruction; special programs; neurologically handicapped; dyslexia; perceptually handicapped; family background; intelligence tests; diagnostic tests; directories

Intended for parents and classroom teachers, the book translates the often technical professional literature which already exists concerning children with learning disorders. Dyslexia (the lack of ability or inability to read) is discussed, and two case studies are provided. Minimal brain dysfunction and the range of its terminology and symptoms are also treated. Information on testing and teaching includes checklists and sample visual materials. Also given are a glossary of 24 items, a suggested reading list of 64 items, a list of 27 references, and a 148-page directory (organized by states) of private and public agencies which provide testing, diagnosis, and special education services for children with learning disabilities. For each facility, address, directory, diagnostic facilities, testing facilities, educational facilities, and special requirements are stated. This document is available from Topaz Books, Five North Wabash Avenue, Chicago, Illinois 60602, for \$6.50. (DF)

Recreation and Socialization for the Brain Injured Child.
New Jersey Assn. For Brain Injured Child., East Orange
EDRS mf, hc

Descriptors: exceptional child education; learning disabilities; recreation; ophthalmology; parent counseling; recreational programs; children; socialization; minimally brain injured; recreational activities; social recreation programs; games; program administration; perceptual motor coordination; perceptual development; primary grades; guidance; parent attitudes; adolescents; summer programs; day schools; day camp programs; program planning

Designed for parents and specialists planning therapeutically oriented recreational and socialization programs for brain injured children, this document contains 13 chapters by different authors. Activities discussed are generally noncompetitive, emphasizing structure and limit. Discussed are (1) the role of the optometrist with the inadequate learner, (2) organization and administration of recreational programs, (3) activi-

ty guides, (4) games and exercises for adolescent boys, (5) recreation and socialization activities for the adolescent girl, (6) instructional swimming programs, (7) a therapeutic recreation program, (8) organization of a summer day camp, (9) an individual and group perceptual motor training program, (10) a day school recreation program, (11) perceptual motor training for early primary grade children, (12) guidance for parents, and (13) parent counseling. Views from parents are reported. A supplement treats preschool perceptual skills and optometric visual care. Concerned organizations, resources, and a 50-item bibliography are provided along with individual bibliographies for some chapters. (JD)

A revision by the Levinson Foundation staff of a book written by Dr. Abraham Levinson in 1952, and written for parents of mentally retarded children, this book reviews typical parental reactions to the birth of a retarded child and offers advice on home care, sibling acceptance, and discipline. Its contents include such matters as historical background, the concept of mental retardation, structure and function of the brain, team approach to diagnosis, early recognition, causes, treatment, prevention, education, community and state responsibility, progress in research, and outlook for the future. The final chapter contains answers to 29 specific questions most often asked by parents. Also included are sources of current annotated listings of schools and institutions and a list of 22 selected readings. This document was published by the John Day Company, 62 West 45th Street, New York, New York 10036, and is available for \$4.50. (DF)

Descriptors: exceptional child education; gifted; family (sociological unit);

adolescents; parent education; student characteristics; parent school relationship; community resources; special programs; parent student relationship; college preparation; guidance; parent role; child rearing

Directed to parents of gifted teenagers, this publication gives a composite picture of an adolescent and presents giftedness in terms of home, school, parent, and child relationships. The nature of giftedness and of the misconceptions of it are discussed. Cooperation with the school is considered in terms of school relations, identification of talented teenagers, the IQ, and essentials of a school's program for developing talent. The parents' role in helping the adolescent to set up goals and in providing understanding, acceptance, love, affection, encouragement, supervision, and good study arrangements is described. The problem of underachievement is examined. Future planning for the gifted is discussed, including planning a career, college education, preparation for college in high school, procedures for selection of and application to college, the cost of education, and financial aid programs. The use of community resources for the development of talent is mentioned. Case studies of a science service and a children's theater and an annotated reading list of 10 books are provided. (SN)

Recreation for Retarded Teenagers and Young Adults.

EDRS not available
Abingdon Press, 201 Eighth Avenue South, Nashville, Tennessee 37202 (\$4.95).

Descriptors: exceptional child education; mentally handicapped; recreation; program planning; family (sociological unit); activities; group activities; adolescents; young adults; music; games; recreational programs; hobbies; handicrafts; community involvement; social development

Intended for recreational leaders, classroom teachers, volunteers, and parents, the text presents guidelines for planning and conducting activities for mentally retarded youth and young adults. Consideration of understanding the maturing retardate and his social needs includes different kinds of beneficial social experiences, the maturing retardate, establishing purposes and goals for organized recreation, and areas of development. Discussion of an organized program treats the roles of director, parents, and volunteers; the program structure; and flexibility and growth. Also presented are the following: group activities such as music, games, and parties; special interests in sports, handicraft, nature and hobbies, and homemaking hobbies; and family centered activities in the community and at home. Supple-

mentary materials listed are 17 periodical articles, 55 books and pamphlets, and 15 sources of continuing information (DF)

PHS-PUB-1646

Superintendent Of Documents, U. S. Government Printing Office, Washington, D. C. 20402 (1967-0-262-721, \$0.20).

Descriptors: exceptional child services; learning disabilities; identification; educational needs; etiology; incidence; minimally brain injured; clinical diagnosis; teaching methods; family problems; language handicaps; recreational activities; behavior problems; medical treatment; research projects; organizations (groups); parent attitudes; educational diagnosis; self care skills; child rearing

The pamphlet considers characteristics of children with learning disabilities due to minimal brain dysfunction (MBD); different terms in this disability; problems in the future of these children; incidence; medical, behavioral, and educational symptoms; causes and prevention of MBD; and medical and educational diagnosis. Approaches to helping these children which are described include achieving maximum physical health and providing special teaching and living methods. Family plans outlined concern dressing, eating, room furnishings, games and play, speech and language, trips, and parental attitudes. Research in learning disabilities, and groups and agencies concerned with the minimally brain injured are discussed. (RP)

How You Can Help Your Retarded Child; A Manual for Parents.
 EDRS not available
 J. B. Lippincott Company, East Washington Square, Philadelphia, Pennsylvania 19105 (\$3.95).
 Revision Of The Book Originally Published As Child In The Shadows.

Descriptors: exceptional child education; mentally handicapped; family (sociological unit); child development; parent attitudes; parent child relationship; parent role; parent reaction; etiology; individual characteristics; child rearing; self care skills; emotional development; intellectual development

Directed to parents of mentally retarded children, the manual describes the problem of retardation that these parents must face and their reactions to it. Mental retardation is explained, and both emotional and social maturity are discussed. The necessity of choosing a life plan for the retarded child and factors involved in the decision are considered, as are current trends in the field of mental retardation. A question and answer section and a 27-item annotated bibliography are provided. (SN)

Descriptors: exceptional child education; family (sociological unit); handicapped children; child rearing; parents; psychological evaluation; mental retardation; behavior; parent attitudes; recreation; case studies (education); physically handicapped; mentally handicapped; behavior problems; directories; state programs; instructional materials; guides

Designed as a guide for parents of handicapped children, this book provides information on types of handicaps and the aims and techniques of treatment, therapy, and education. Specific recommendations to help parents raise a handicapped child are discussed. Behavior problems, parent attitudes, daily problems, and recreation are examined in detail and illustrated by case studies. Included are charts listing each state's provisions for special education, vocational rehabilitation, state care, and state aid. Addresses are given for national and state agencies serving handicapped children. (MY)

Handicap Race; The Inspiring Story of Roger Arnett.
 EDRS not available
 McGraw-Hill Book Company, 330 West 42nd Street, New York, New York 10036 (\$5.95).

Descriptor: exceptional child education; physically handicapped; achievement; family (sociological unit); academic achievement; productive living; amputees; orthopedically handicapped; rehabilitation; farmers; clergymen; senior citizens; family involvement; family relationship; adopted children; nursing homes; national organizations; employment; biographies; employer attitudes

Roger Arnett was a college student and record-breaking track runner in 1931 when an automobile accident paralyzed the lower part of his body. His biography describes how, with the help of family and friends and great determination, he overcame his despair and learned to live a full life from his wheelchair. His life with his wife, a childhood polio victim, and their three adopted children is presented; his accomplishments are described including completing college, working at various jobs, growing and developing several new prize winning strains of gladioli, and becoming a minister to the physically disabled whom he visited in hospitals and nursing homes. Physical troubles such as many infections and ailments resulting from his paralysis, causing a

leg amputation, and seriously threatening his health and life are discussed. His national achievements include getting Congress to establish a National Employ the Handicapped Week and actively promoting the American Federation of the Physically Handicapped. (LE)

Descriptors: exceptional child education; speech handicapped; child development; speech therapy; hard of hearing; articulation; cleft palate; speech evaluation; retarded speech development; cerebral palsy; stuttering; speech pathology; speech skills; speech handicaps; speech improvement; reading difficulty; emotional adjustment; social adjustment; personality

Designed for parents, teachers, and speech clinicians, the book discusses speech disorders. Voice quality, pitch, volume rate, pronunciation, and articulation are defined; and the physical development of speech, first vocal response, and speech stimulation are considered. Specific speech disorders treated are delayed speech, articulation, stuttering symptoms, children with cerebral palsy, and children with cleft palate speech. Related problems detailed include hearing, reading problems, and personality and educational, emotional, and social adjustment. Projects and references are listed throughout. Appendixes include a 27-item bibliography, testing materials, exercises for use in practice of voice and articulation, original playlets for parent-teacher groups, suggested programs for parents and teachers, case studies, and a list of five national agencies. Where's Hannah; A Handbook for Parents and Teachers of Children with Learning Disorders.
 EDRS not available
 Hart Publishing Company, Inc., 510 6th Avenue, New York, New York 10009 (\$8.50).

Descriptors: exceptional child education; learning disabilities; teaching methods; behavior problems; behavior change; case studies (education); minimally brain injured; parent participation; etiology; clinical diagnosis; testing; psychomotor skills; perceptual motor learning; space orientation; child development; learning characteristics; individual characteristics; perceptually handicapped; learning activities; self concept; Movigenics

The story of a mother and a teacher relates the experiences of Hannah, a brain-injured, 11 1/2 year-old girl. The history of her characteristics, development, and training is interlaced with explanations of her behavior, of the characteristics of other children with learning disorders, and of training objectives based on the Movigenic theory of Ray H. Barsch which stresses acquisition of position in space. Activities are described for structuring the environment to control stress factors of space, time, language, and task multiplicity and level. Also described are the developmental process, testing and evaluation, teaching methods, behavior management, building self concept, and causes of brain injury. The role of the parent in helping the child and a schedule of lessons for one week are included. Also included are a chart of experiences from infancy to 8 years and a list of 15 national organizations which aid handicapped children. (LE)

ABSTRACT 11262

 Seagoe, May V.
Yesterday Was Tuesday, All Day and All Night; The Story of a Unique Education.
 EDRS not available
 Little, Brown And Company, 34 Beacon Street, Boston, Massachusetts 02106 (\$5.00).

Descriptors: exceptional child education; mentally handicapped; child development; teaching methods; family (sociological unit); mongolism; biographies; self actualization; self expression; language ability; childhood; early childhood; adult development; young adults; institutionalized (persons); tutoring; fathers; family attitudes; family life; achievement; case studies (education)

The story of a mongoloid's life is presented (1916-63) as seen through his diary and through his teachers' accounts. The child's family, his first attempts at reading and writing in a formal education setting, and his travels are described. Entries from his diary and comments inserted by May Seagoe illustrate the effect of his father's death and treat a period of drifting after which he was placed in a large eastern private school for the mentally retarded. The diary ends in 1959, but letters show his reactions to residential placement over a 4-year period until his death at age 47 in 1963. In an epilogue, the author considers a number of questions related to mongolism. (DF)

 Egg, Maria
Educating the Child Who Is Different.
 EDRS not available
 The John Day Company, Inc., 62 West 45th Street, New York, New York 10036 (\$4.50).

Descriptors: exceptional child education; mentally handicapped; curriculum; family (sociological unit); parent counseling; parent attitudes; parent teacher cooperation; day schools; residential schools; placement; teaching methods; student characteristics; art; music; mathematics; language arts; religious education

Intended for both parents and teachers, the book discusses the education of mentally retarded children. Part 1 considers the relationship of the teacher to the retarded child and his family, how educators can help parents, the importance of cooperation between parents and teachers, characteristics of moderately retarded children, and the question of placement in residential or day schools. Part 2, after discussing whether the school should educate or train, how the children are to be taught, and what they should learn, deals with the following curriculum areas: play, music and rhythm, drawing and painting, manual arts, number concepts and calculating, reading, and writing. Special attention is given to the wisdom of teaching academic skills, the learning environment, and religious education. (DF)

 Harris, Grace; Weber, Larry
Babies with Hearing Losses.
 Society For Crippled Children And Adults, Manitoba, Winnipeg, Canada, Pre-School Service; For The Deaf; Hearing And Speech Institute, Hamilton, Ontario, Canada
 EDRS not available
 Volta Review; V69 N9 P604-9 Nov 1967

Descriptors: exceptional child education; aurally handicapped; infants; identification; parent involvement; teaching methods; auditory training; hearing aids; language development; oral communication; preschool children; deaf; hard of hearing; parent education

Early diagnosis of hearing handicaps in infants and some conditions causing deafness are considered; the specialist team approach is suggested for multiply handicapped children. Treatment of babies with hearing losses as soon as the presence of the impairment is established is discussed; methods by which parents can help develop language skills by providing the verbal and contact experiences include talking and singing to the baby; rocking him; looking at pictures with him; playing games; and using blocks, cars, and toys. Providing the infant with a hearing aid fitted by a qualified audiologist is recommended to maintain awareness of sounds. Other suggestions for parents are to try to develop all of the child's senses, cooperate with professionals, maintain reasonable expectations, and avoid overcompensation. (CH)

The Stuttering Child--In the School and in the Home.

EDRS not available
 Interstate Printers & Publishers, Inc., Danville, Illinois 61832 (\$0.60).

Descriptors: exceptional child education; speech handicapped; speech therapy; stuttering; speech improvement; speech habits; individual characteristics; etiology; teacher role; parent participation; intelligence; heredity; adjustment (to environment)

Directed to the classroom teacher and the parent, the pamphlet describes stuttering as a problem in fluency, provides a definition, explains the European term, stammering, and discusses primary and secondary stuttering. The following aspects are also reviewed: the lack of an organic cause for stuttering, and the relationship of stuttering to intelligence, heredity, imitation, and personality. The development of stuttering is outlined; 17 suggestions are made for helping the primary stutterer and 10 for helping the secondary stutterer. Thirteen common techniques which are believed to be of no value are listed. (JD)

Descriptors: exceptional child services; perception; learning disabilities; educational needs; minimally brain injured; dyslexia; aphasia; neurologically handicapped; clinical diagnosis; clinics; self concept; case studies (education); family problems; educational programs; educational planning; child rearing; special schools; educational legislation; student teacher relationship; parent child relationship

Directed to teachers, volunteers, and parents working with the unlearning child, the text describes the child with specific learning disabilities in terms of perception, thought development, language, and symptoms. The damaged child's view of himself as a failure is discussed; case histories are provided; causes stated; and parent and teacher views of the child are presented. Guidelines for parents are provided which describe a study period, discipline, and independence training; guidelines for teachers describe sources of help including the Houston Speech and Hearing Center, the Institute for Language Disorders in Evanston, Illinois, the Pathway School in Morristown, Pennsylvania, and the Menninger Foundation in Topeka, Kansas. The responsibility for these children is examined in light of legislative programs, recommendations from Associations for Children with Learning Disabilities, the Bureau of Education for the Handicapped, current

research, and activities and information sources. (LE)

Your Child is Asleep: Early Infantile Autism. The Dorsey Series in Psychology.
EDRS not available
The Dorsey Press, Inc., 1818 Ridge Road, Homewood, Illinois 60430 (\$10.60).

Descriptors: exceptional child research; reinforcement; autism; case studies (education); parent role; identification; testing; neurological organization; parent child relationship; therapeutic environment; language development; withdrawal tendencies (psychology); communication problems; positive reinforcement; operant conditioning; clinical diagnosis; child development

Focusing on the education of the autistic child as an awakening process, the book discusses the role of meaningful human communication and reports a research program which applied a therapeutic educational technique. The development of language in children, the diagnosis of an autistic child, autistic behavior and sensory and emotional deprivation, and etiological considerations in sensory deprivation and early infantile autism are discussed. Treatment techniques are described and involve the following considerations: developmental arrest, family role of maintaining a climate of high affective arousal, the clinical setting, the role of the therapist, and the operant conditioning approach. Case studies of five autistic children are reported from the beginning of treatment to school placement and/or followup; also reported are family relationships and changes, testing of autistic children, and implications of results for other childhood deviations. An appendix lists statistical data for the five children on the Vineland and Fels Behavior Scales. (RJ)

How to Raise a Brighter Child; The Case for Early Learning.
EDRS not available
Trident Press, Rockefeller Center, 630 Fifth Avenue, New York, New York 10020 (\$5.95).

Descriptors: early childhood education; learning; environmental influences; teaching methods; infants; preschool children; child rearing; intellectual development; parent role; intelligence; reading; creativity; health; prenatal influences; injuries; infectious diseases; gifted; Montessori

The case is made for early learning, and suggestions are presented to assist parents in providing stimulating care and environment for their preschool children. Research evidence is frequently cited. The parent is described as the child's first teacher; why the parent can raise a brighter child and how the home

atmosphere can foster intelligence are discussed. Methods are detailed for children from birth to 18 months, 18 months to 3 years and 3 to 6 years. Further areas considered include reading for the preschooler, creativity, Montessori techniques, safe guarding the child's brain, and prenatal care. Finally, the joys of having a bright child are detailed. (LE)

Descriptors: exceptional child education; aurally handicapped; teaching methods; parent role; auditory training; lipreading; pictorial stimuli; speech therapy; educational games; listening habits; hearing aids; deaf

Designed for the parents of young deaf children, the pamphlet provides suggestions for teaching communication skills. A recommendation for a complete physical and hearing examination is followed by a discussion of teaching through meaningful repetition and creative repetition. Instructions are given for use of the hand as a communication clue and for aspects of auditory training including conditioning to sound, hearing aids, listening and general and specific lipreading. Helping the child learn to talk

is also discussed. Appendixes include a list of frequently used expressions helpful for repetition, suggestions for planning the creative repetition of 10 words, expressions helpful for specific words, and criteria for pictures to be used in teaching. (RJ)

Barbara; The Unconscious Autobiography of a Child Genius.
EDRS not available
University Of North Carolina Press, Chapel Hill, North Carolina 27514.

Descriptors: gifted; creativity; biographies; composition (literary); creative writing; imagination; family relationship; authors; literature

This case study consists of an autobiography of a child genius, Barbara Newhall Follett, (1914 to 1939), through her writings and through a biography (background information on her home and the circumstances of her education) provided by her author mother, Helen Thomas Follett. Barbara's genius was never tested or educated formally but is accepted through her literary talent. The writings (from ages 4 to 25) include selections from her first book, published at 13 years of age, prose and poetry (fact, fiction, and fantasy), as well as selected personal correspondence. The autobiographical and biographical materials are closely interwoven and paralleled so that the reader is allowed to compare the development, at any point of time, of Barbara's outer life while experiencing the expressions of her innermost life. For the Parents of a Child Whose Speech is Delayed.

EDRS not available

The Interstate Printers & Publishers, Danville, Illinois 61832.

Descriptors: exceptional child education; speech handicapped; family influence; speech therapy; family attitudes; family relationship; training techniques; speech improvement; verbal communication; imitation; readiness; etiology; retarded speech development; speech instruction

Written for the parents of a child with delayed speech, the booklet explains and describes speech in the home, how speech is learned, and the beginning of sounds and words. The responsibilities and the opportunities parents have for encouraging the speech growth of their children are discussed. Delayed speech is defined and nine causes are mentioned: low intelligence, brain damage, hearing loss, illness, poor speech in the home, accidents or shock, no need for speech, conflict in the home, and poor teaching. Suggestions for preparing the child for speech are given; speech readiness is explained; 18 suggestions of what parents can do for 4 and 5 year old children with retarded speech are listed, and 10 publications for parents are cited. Descriptors: exceptional child education; mentally handicapped; parent attitudes; family influence; self care skills; eating habits; speech skills; training techniques; interpersonal competence; social integration; child rearing; parent role; parent child relationship; social development; teaching methods

The author describes the various emotions which many parents of retarded children experience as they discover and try to accept their child's condition. Suggestions are provided for improving the retarded child's interaction and acceptance in relationships with parents, sisters, brothers, relatives, neighbors, and strangers. Specific guidelines are presented for parents in the benefits and instruction of good habits and general training to facilitate the improvement of the child's overall behavior and social ability. Techniques for parental training include the ability areas of walking, speech, eating, drinking, table manners, undressing and dressing, cleanliness, and toilet training. Services to assist parents are also suggested. (RD)

Descriptors: exceptional child education; gifted; superior students; talented students; identification; student characteristics; learning characteristics; ability grouping; ability identification; acceleration; enrichment; enrichment activities; creativity; motivation; guidance; administration; administrative organization; teacher role; parent role; community role

Emphasis is placed on specific suggestions for educational techniques and school programs for the gifted. Written for teachers at all levels, administrators, guidance workers, and parents, the text defines the problem of education for the gifted, along with methods of identification and specific characteristics of these children. Instructions for planning and administering a program are offered, and examples of representative school programs are described. The following three types of administrative grouping are explained: ability grouping, acceleration, and enrichment. A variety of suggestions for enrichment in the areas of science, mathematics, language arts, and social studies are presented. Photographs from various school systems illustrate activities for gifted; methods for motivating the gifted child and for providing for various types of guidance are discussed. Exploration of creativity in gifted students and suggestions for its cultivation are described. The roles of the teacher, parents, and the community are covered and attention is given to their influence in the educational attainment of gifted children. (DS)

A Manual for Parents and Teachers of Severely and Moderately Retarded Children. IMRID Papers and Reports, Volume V, Number 22.
Institute On Mental Retardation And Intellectual Development, Nashville, Tennessee
EDRS mf, hc
IMRID, Box 163, George Peabody College, Nashville, Tennessee 37203 (\$0.50).

Descriptors: exceptional child education; mentally handicapped; behavior change; teaching methods; self care skills; instructional materials; learning; operant conditioning; reinforcement; pretesting; post testing; behavior rating scales; rewards; positive reinforcement; negative reinforcement; self reward; verbal operant conditioning; task analysis; visually handicapped; aurally handicapped; custodial mentally handicapped; trainable mentally handicapped

Designed for both parents and teachers, the handbook presents methods for educating the moderately and severely retarded child. Those methods include measuring progress, rewarding and punishing, ways of using rewards and punishers, ways of giving positive reinforcers and punishers, withholding reinforcers (extinction), letting the child reward himself, spacing giving reinforcers, shaping behavior in small steps, using

signals, and building control. Twenty-three activities are next presented, each with a task definition, pretest, and suggested education program. These activities include sitting quietly; building puzzles; coloring; playing with toys, balls, and wagons; toilet training; eating correctly; putting on a pullover shirt, pants, and socks; buttoning buttons; tying shoe laces; brushing teeth; washing; imitating movements, mouth movements, sounds, and words; understanding words and the names of colors; naming objects, actions, and colors; and talking in sentences. Appendixes include materials needed for the activities, suggested reinforcers, sample forms for pre- and post-test, glossary, and applications to blind and deaf children. (LE)

Fine, Benjamin

Underachievers, How They Can Be Helped.

EDRS not available
E. P. Dutton & Company, Inc., 201 Park Avenue South, New York, New York 10003 (\$4.95).

Descriptors: exceptional child education; achievement; adjustment (to environment); family (sociological unit); environmental influences; low achievement factors; behavior; underachievers; special programs; behavior patterns; parent child relationship; parent attitudes; parent role; instructional materials; student teacher relationship; etiology; self concept; educational methods; Sands Point Country Day School

Addressed to parents and teachers, the

book considers the problem of underachievers. After a review of the problem, tests, and what they show, overinvolved and involved parents, self esteem and self image, and childhood rebellion are treated. Also considered are the following: the wrong school and wrong teacher, reading instruction, the disadvantaged child, what Washington is doing to help, and the isolated instances of physical cause. Programs in the schools of Port Chester, New York, in the communities of Winnetka and Glencoe, Illinois, and at Sands Point, New York (where the author is headmaster) are explained; the role of educational publishers and of media products and programmed materials is considered; and the social and educational climate of our times is discussed. A 112-item bibliography, anecdotes, and references to research studies are provided. (JD)

Descriptors: handicapped children; physically handicapped; parent child relationship; parent role; rehabilitation; medical services; educational needs; employment opportunities; recreational activities; social adjustment; sex education; self care skills; prostheses; family problems; educational programs

Written basically for parents of handicapped children, the book offers suggestions for care, advice on behavior, and discusses the needs of both parent and child. Some areas of concern are understanding of parent and child problems in daily family living, the relationship and search for medical care, hospitalization and therapy, parental emotions concerning the child's education, educational needs and facilities, and problems in actual school situations. Information is also presented on possible employment, parental influence in choosing a vocation, attainment of goals, suggestions for recreation and play activities, and sexual and social development problems from childhood through adulthood. Also discussed are problems in home management, some self help aids, and suggestions for the easier management of braces, wheelchairs, crutches, artificial limbs, and elimination processes. Suggested readings and a list of helpful agencies are provided. (JM)

Descriptors: physically handicapped; autobiographies; rehabilitation; medical treatment; physical therapy; family background; adjustment (to environment); rehabilitation counseling; vocational rehabilitation; employment opportunities; employer attitudes; discriminatory attitudes (social)

The personal story of Henry Viscardi, a man born with deformed and stunted legs, unfolds through his early operations, life in the hospital, at home, and at college, and his progress in walking with orthopedic shoes, his fitting with artificial legs, and his efforts in assisting other physically disabled people. From his first hand knowledge of the problems faced by the disabled he encouraged amputees, men crippled during World War II, and others to fight for their self respect and for productive lives. His role in encouraging the armed forces to provide better rehabilitation services and his business ventures, including the establishment of an organization to

place the physically handicapped in jobs matched to their abilities, are related. (RJ)

Bergler, Edmund
Parents Not Guilty of Their Children's Neuroses.

EDRS not available
Liveright Publishing Corporation, 386 Park Avenue South, New York, New York 10016 (\$6.95).

Descriptors: neurosis; parent responsibility; parent role; parent child relationship; parent counseling; psychotherapy; neurotic children; child rearing; fear; child development; maladjustment; case studies; anxiety; psychological characteristics; psychological patterns; emotionally disturbed; hostility; marital instability; sexuality

Parent fears of making mistakes in child rearing and the unjustness of these fears are explored, and the infant is discussed in terms of inborn problems and reality as the baby sees it. The role of the child's unconscious in accepting parental teaching, the power and limits of love and understanding as the approach to child rearing, and the differences between mental health and neurosis are considered. Twenty cases are examined for signs of parent influence in the development of neurosis. Parent expectations and the real child and the neurotic child's way of solving inner conflict are discussed, and parental guilt and fear of children are described. (RJ)

Descriptors: exceptional child services; mentally handicapped; parent counseling; parent participation; mental retardation; child development; parent child relationship; behavior problems; community programs; language development; behavior development; social development; self care skills; child rearing; residential care

The book offers advice to parents of retarded children in recognizing and facing inherent problems and provides insight into their own emotional needs and those of their child. Levels of retardation are described and assistance given to aid parents in determining how retarded their child is and whether to send the child to a residential school or keep him at home. Specific suggestions are made for helping the child to help himself, to become more independent, to play, to talk, to gain acceptance, and to control his behavior. A total program for the retarded in the community is discussed. (LE)

Descriptors: exceptional child education; aurally handicapped; parent education; hearing aids; language development; speech improvement; discipline; auditory training

Written for parents, the book explores child rearing problems which might be encountered by parents of young hearing impaired children. Information is presented in areas where conventional child rearing philosophy must be modified: parental attitudes, communication, discipline, and toilet training. Function and care of hearing aids are explained. Normal speech and language development is interpreted in relation to the hearing impaired child. The latter half of the book contains a series of lesson plans which progress from gross to fine sound discrimination. Emphasis is first on building vocabulary and language concepts, followed by training in speech sounds. Appendixes include reference and teaching materials. Of particular interest is a program outline for auditory training, which suggests possible teaching units. (JB)

East Lawrence Avenue, Springfield, Illinois 62703 (\$4.50).

Descriptors: aurally handicapped; parent education; child rearing; parent child relationship; parent attitudes; self care skills; childhood needs; communication skills; expectation; services

Written for parents, the book explores problems which are faced in rearing deaf and hard-of-hearing children. General orientation material includes a definition and history of deafness and sound, and function of the ear, with special application to children. Causes

and types of deafness are explained, as are possible attitudes toward the deaf. Discussion of the deaf child covers his needs (family, success, independence, etc.); learning to care for himself; learning to communicate (speech, hearing aid, speech reading, auditory training, etc.); and what parents may expect from their child in terms of personality, school achievement, earning a living, etc. A final chapter is devoted to sources of help for parents, lists of organizations and schools for the deaf and hard-of-hearing, and reading materials. Speech Given Before The North Shore Mental Health Association And Irene

Josselyn Clinic (Chicago, Illinois, October 29, 1969).

Descriptors: exceptional child education; handicapped children; learning difficulties; parent reaction; parent attitudes; learning readiness; educational needs; cognitive development; speech improvement; emotionally disturbed; perceptual motor learning; educational diagnosis

Presented is an informal speech addressed to parents of exceptional children. Discussed is the fact that terminology for slow learners and learning disabilities has changed through the past 20 years and that many labels may be more harmful to the child than the actual disability. In an attempt to be reassuring, it is stated that in many cases, speech, motor, and cognitive difficulties clear up in the development process if merely left to work themselves out at the child's own pace. Several individual cases are described. (JM)

Personal, social, and educational problems related to children and youth who have serious deficiencies of hearing are the topics of this book, written for the student in training as well as for the handicapped person, his parents, school and community. A brief historical background of the deaf is included followed by discussions of preschool considerations, educating youth, post-school thoughts, spreading knowledge to the

parents and the public, psychological aspects and professional hints. Suggestions for teachers, parents and professionals, based on the authors' twenty years of actual experiences and procedures are included. (GD)

The Child with a Possible Organic Brain Disorder.
Washburn Memorial Clinic, Minneapolis
EDRS not available
Washburn Memorial Clinic, 3225 Lyndale Avenue South, Minneapolis, Minnesota 55408 (\$0.50).

Descriptors: learning disabilities; minimally brain injured; neurologically handicapped; neurology; emotionally disturbed; medical evaluation; psychophysiology; clinical diagnosis; biological influences; behavior

The practical booklet for parents and school personnel discusses brain injury-definition, diagnostic procedures, difficulty of diagnosis, why emotional disturbances frequently result, specific handicaps, and treatment. It is explained that the minimally brain injured child will likely suffer more from psychological disturbance due to lack of understanding of his handicap than from the handicap itself. Although the physical disturbance generally cannot be remedied, it is suggested that the brain may be able to compensate for injuries, and the psychological disturbances of behavior and personality can be treated. Two case histories are summarized. (JM)

Langford, William S.
Physical Illness and Convalescence: Their Meaning to the Child.
EDRS not available
Journal Of Pediatrics; V33 P242-50 1948

Descriptors: hospitalized children; childhood attitudes; reactive behavior; child psychology; anxiety; physicians; parent role; staff role; pediatrics

Regressive, rebellious, and hypochondriacal, and dependency reactions of children to their hospitalization are described with emphasis placed upon the role played by the parents' and children's reactions and interactions, parental preparation of the child for hospitalization, the child's anxiety with regard to the cause of the illness and guilt over supposed responsibility for it, and the child's fear that his illness is a punishment (according to one study cited). In addition, constructive reactions to hospitalization are discussed, in which the role of the parent, teacher, occupational therapist, and physician, as well as play therapy, are described. Specific examples of the various maladaptive reactions are included, and specific suggestions are offered to the physician for

prevention or amelioration of such reactions. (BG)

Shere, Marie Orr
Speech and Language Training for the Cerebral Palsied Child at Home.
EDRS not available
Interstate Printers And Publishers, 19-27 North Jackson Street, Danville, Illinois (\$1.00).

Descriptors: exceptional child education; cerebral palsy; speech handicaps; speech therapy; speech instruction; parent participation; teaching techniques; home instruction

Written for parents of cerebral palsied children, the booklet suggests ways in which they may work with the child's speech when a qualified teacher is not available. Relaxation is emphasized, both in the home atmosphere and with specific exercises. The importance of speech related activities (chewing, sucking, and swallowing), motivating the child to talk, and general speech improvement are explored, including specific suggestions for working with cerebral palsied children. Mouth exercises, books, stories, toys, and good speech models are recommended among other things. When speech development is delayed, the booklet recommends that the parent take the child to a clinic for evaluation. General instructions for giving lessons stress pleasant surroundings and a regular schedule. Specific games and seasonal activities are listed. Appendixes contain a speech evaluation form, suggested physical exercises (for relaxation, breathing, coordination), reprints of pertinent articles by the author, additional lesson material, and rules for therapy. Robbins, Nan
Speech Beginnings for the Deaf-Blind Child: A Guide for Parents.
EDRS not available
Perkins School For The Blind, Watertown, Massachusetts 02172 (\$2.00).

Descriptors: exceptional child education; multiply handicapped; language development; deaf blind; oral communication; speech instruction; parent participation; guidelines; learning processes; teaching techniques; behavior; social development; lipreading

Designed for parents of deaf-blind children, the booklet discusses processes by which children learn to speak and the relationships between communication and physical, mental, and social growth. Speech development in normal children is compared with that of deaf-blind children. Specific areas are outlined in which parents may assist their deaf-blind children in attaining speech readiness. Social development and life experiences are emphasized. The necessity for helping the child become independent is

discussed with regard to eating, dressing, washing and toileting, getting about, and playing with others. These experiences are related to the steps in learning speech: awareness, non-verbal communication, understanding speech, speech. Parental attitudes and activities are discussed, with recommendations for maintaining healthy relationships with the child. (JB)

Descriptors: exceptional child education; learning disabilities; case studies (education); biographies; individual instruction; individualized programs; parent participation; psychomotor skills; individual development; perceptual motor coordination

A mother's account reveals the frustrations felt in raising a brain damaged son. The child was initially diagnosed as severely retarded with the advice to place him in an institution. The narrative account tells of her decision to raise him in the family with the ensuing discovery and implementation of Kephart's educational program and Doman and Delacato's patterning exercises. The case illustrates the growth and development of the child with the result that he is now functioning, at age 8, at the third grade level in a learning disabilities class, plays imaginatively, has greatly expanded attention span and is aware of his world. Suggestions for Parents of Deaf Children.
Vocational Rehabilitation Administration (DHEW), Washington, D. C.

EDRS not available

RD-2407-S

Companion; V94 N5 P1-3 Mar 1969
Reprinted From The Deaf American, V20 N10 June 1968.

Descriptors: exceptional child education; aurally handicapped; child rearing; parent attitudes; communication (thought transfer); family school relationship

Three aspects of rearing a deaf child are considered: communication, parent-school-child interaction, and the deaf child's future. It is suggested that parents need to determine objectively if they are really communicating with their child both as to subject matter and as to method of language (oral or manual). The combined oral-manual method is recommended from the start for deaf infants. Why some parents fail to face up to the communication problem is discussed (misinformation and emotional problems). The section on parent-school-child relationship stresses that even while parents are objectively critical of the school, the parents and school should work together, never depreciate one another in front of the child, and cooperate in matters of discipline. Specific suggestions for parents are given. It is also suggested that parents should start early to evaluate their child academically and vocationally. Plans can then be made according to opportunities available and the type of school program received by the child. (GD)

Volta Review; V72 N7 P425-7 Oct 1970-

Descriptors: exceptional child education; aurally handicapped; parent education; parent responsibility; parent child relationship; preschool learning; family influence

Advice is given to parents of preschool deaf children to guide them in helping their child make the best progress possi-

ble. Emphasized is the child's need to feel a part of a normal family life and not be treated differently than other siblings. Suggestions for planning worthwhile family outings are made, and for how to make all situations a sharing-of-information kind of learning situation. (KW)

Volta Review; V72 N7 P431-7 Oct 1970

Descriptors: aurally handicapped; parent role; parent attitudes; parent child relationship; family problems; deaf

Speaking as a mother, the author cites some of the problems faced by the family of a deaf child. These include feelings of vulnerability, guilt, and tenseness. Advocated are the clarification of the roles of specialists, teachers, and parents, and the involvement of parents in all aspects of the education of their children. (Author/KW)
